

AMENDMENT C
(37 C.F.R. 1.116)

IN THE CLAIMS:

Please amend claims 1-4 in accordance with 37 C.F.R. 1.121. A marked-up version of the amended claims is attached herein on separate sheets and a clean version of the amended claims is also attached herein on separate sheets.

Please add new claims 28 - 31, attached herein on separate sheets.

Please cancel claims 8-11 without prejudice.

REMARKS

Pursuant to 37 C.F.R. §1.116, reconsideration of the instant application, as amended herewith, is respectfully requested. Entry of the amendment is requested.

Claims 1-4, 12-19 and 28-31 are presently pending before the Office. Claims 8-11 have been canceled. Applicants have amended claims 1-4 and added new claims 28-31. No new matter has been added. Support for the amendments can be found throughout the specification as originally filed, and in particular at Pages 1-2, 5 and in the Tables of pages 9-274. Applicants are not intending in any manner to narrow the scope of the originally filed claims.

The Examiner's Action mailed July 8, 2002 (Paper No. 11) and the references cited therein have been carefully studied by Applicant and the undersigned counsel. The amendments appearing herein and these explanatory remarks are believed to be fully responsive to the Action. Accordingly, this important patent application is believed to be in condition for allowance.

Relying on 35 U.S.C. §112, second paragraph, the Office has rejected the subject matter of the pending claims as being indefinite for failing to particularly point out and distinctly claim the subject matter which Applicant regards as the invention. The Examiner alleges that it is unclear as to what molecular compound is being formed and the organic compound has not been identified. Applicants respectfully traverse the rejection and request reconsideration.

Applicants submits that the pending claims do define the legal metes and bounds of the invention. It is not the role of the claims to enable one skilled in the art to reproduce the invention but rather to define, for those skilled in the art the legal metes and bounds of the invention. Nevertheless, in order to advance the case to allowance, claims 1-4 have been amended to further clarify the claim limitations.

It is respectfully submitted that the pending claims in this response fully comply with 35 U.S.C. §112, second paragraph. Withdrawal of the rejection is respectfully requested.

CONCLUSION

Even though the initial claims in this important patent application were drawn to a new, useful and nonobvious invention, they have now been amended to increase their specificity of language. Applicant respectfully submits that the pending claims are patentable over the art of record.

A Notice of Allowance is earnestly solicited.

If the Office is not fully persuaded as to the merits of Applicant's position, or if an

Examiner's Amendment would place the pending claims in condition for allowance, a telephone call to the undersigned at (727) 538-3800 would be appreciated.

Very respectfully,

Dated: 10/7/02
